Everton Mendes Gonçalves da Silva

São Carlos, SP, Brazil (Open to Remote / Hybrid Opportunities)
+55 (81) 99527-8116 • emendesgs@gmail.com
LinkedIn: in/emendesgs GitHub: github.com/emendesgs

Senior Software Engineer with extensive experience developing mission-critical, large-scale distributed systems across the financial (banking) and retail sectors. Specialist in the **Angular ecosystem (Signals, Standalone, RxJS)**, **Micro-frontends architecture (Module Federation)**, and enterprise **Design Systems**, with solid backend expertise in **Java (Spring Boot)** and **Node.js**. Currently IT Specialist at F1RST (Santander Group), leading frontend modernization and establishing engineering standards. Proven track record in the corporate PIX ecosystem (Bradesco / Capgemini). Prior background in Graphic Design provides a natural, effective bridge between UX/UI excellence and software engineering rigor.

Core Competencies

- **Frontend & Architecture**: Angular (v2+ through modern versions), TypeScript, Signals, RxJS, Micro-frontends (Module Federation, Single-SPA), Monorepos (pnpm, Java), Standalone Components, Performance & Core Web Vitals optimization.
- **Design Systems & UI Engineering**: Conception, documentation, and governance of enterprise Design Systems, accessibility (WCAG), semantic HTML5, CSS3/SASS, seamless cross-functional alignment with UX/UI and Product squads.
- **Backend & Microservices**: Java (Spring Boot, Spring Cloud, JPA/Hibernate), Node.js, RESTful APIs, SQL modeling, transactional resilience, and security in high-concurrency environments.
- **Cloud, Quality & DevOps**: AWS (Cloud Practitioner Essentials), Docker, CI/CD pipelines, Git, Automated Testing (Jasmine, Jest, Cypress), Linux.
- **Leadership & Methodologies**: Technical squad leadership, mentorship, engineering standards definition, Clean Architecture, Agile Methodologies (Scrum/Kanban, SFPC certified).

Professional Experience

- **F1RST Digital Services (Santander Group)** — **São Paulo, SP / Hybrid**
  IT Specialist / Frontend Technical Lead — *May 2026 – Present*
  - Technical leadership and architectural direction in migrating legacy banking platforms into modern Angular micro-frontends ecosystems.
  - Definition of software architecture standards, reusable componentization, and scalable repository governance.
  - Conception and continuous evolution of shared Design Systems, accelerating feature delivery across multiple squads.
  - CI/CD pipeline optimization for automated testing, fast builds, and resilient, decentralized deployments.

- **F1RST Digital Services (Santander Group)** — **São Paulo, SP / Hybrid**
  IT Senior Analyst — *April 2023 – April 2026*
  - Development and maintenance of high-availability, mission-critical solutions for Banco Santander's corporate banking channel (PJ).
  - Hands-on decomposition of legacy monolithic journeys into Angular micro-frontends integrated with Java microservices.
  - Engineering high-performance enterprise web applications with a focus on transactional stability and security.

- **Capgemini SA (Banco Bradesco Project)** — **Remote**
  Senior / Mid-Level Systems Analyst — *November 2021 – March 2023*
  - Development and maintenance of mission-critical strategic modules for the corporate PIX ecosystem, ensuring zero downtime.
  - Development of mobile WebView applications using Angular within Bradesco's corporate and retail mobile channels.
  - Fullstack development integrating frontend interfaces with transactional APIs and services in Node.js and Java.
  - Ensured compliance with Central Bank of Brazil regulatory directives and payment security standards for large-scale operations.
- **Home Center Ferreira Costa** — **Recife, PE / On-site**
  Software Engineer (Promoted from Intern) — *May 2019 – November 2021*
  - Worked in the corporate innovation lab developing functional prototypes and automations for the retail ecosystem.
  - Engineered internal systems with Angular and Node.js that optimized operational efficiency and store process turnaround times.
  - Accelerated promotion from Intern to Software Engineer in recognition of direct business impact and reliable deliveries.

Featured Projects

- **EventPro (Lance-X Platform)**: Fullstack mobile-first SaaS application with scalable architecture, real-time ranking and staffing workflows, item rentals, and an intuitive UI, demonstrating deep mastery in mobile architecture, user experience, and modern componentization.

Education

- **Universidade Estácio de Sá** — **Brazil**
  Associate Degree in Systems Analysis and Development — *2020 – 2022*
  Focus on Software Engineering, Data Structures, OOP, Systems Architecture, and Database Systems.
- **SAGA** — **Brazil**
  Graphic Designer, Game Design & Digital Media — *2009 – 2012*
  Visual composition, interface ergonomics, typography, color theory, and fundamental UI/UX principles.

Certifications & Qualifications

- **Scrum Foundation Professional Certificate (SFPC)** – CertiProf
- **AWS Partner: AWS Cloud Practitioner Essentials (Classroom)** – Amazon Web Services
- **Angular Academy (100h)** – IMPACTA Tecnologia
- **JAVA & Database Systems (192h)** – START Accenture & Rede Cidadã
- **Global Dev Acceleration #7** – Avanade

Languages

- Portuguese (Native), English (Advanced technical reading, documentation, professional communication & continuous active study), Spanish (Intermediate).
